Efficiency in
animal husbandry

Real-time tracking:
It allows you to track the location of your animals at all times, making it easier to manage the herd and quickly find them when needed.

Protection against loss and theft:
With continuous tracking, you can prevent loss or theft by receiving notifications for unusual movements or leaving the set boundaries.

Protection from wild animals:
The device helps you protect the herd from attacks by wild pigs, jackals, foxes, bears and other wild animals by notifying you of unusual behavior.

Pasture Optimization:
By analyzing animal movement and behavior data, you can optimize pasture use and improve productivity.

Rapid response to emergencies:
In case of illness or injury, GPS tracking allows you to locate the affected animals quickly and provide the necessary assistance in time.

Battery life

in periodic update mode
of the location

Update interval every:	Battery life
10 minutes	2 months
15 minutes	4 months
30 minutes	6 months
